Contents

Part I *Synthetic Metals*, volume 21, issue 1

Introduction 1
W. R. Salaneck and I. Lundström (Linköping, Sweden)

Symposium on Future Trends in Conducting Polymers

Frontiers in the development of polymers as electronic materials 5
C. B. Duke (Webster, NY, U.S.A.)

Some potential applications for conductive polymers 13
O. Inganäs and I. Lundström (Linköping, Sweden)

Polyaniline: processability from aqueous solutions and effect of water vapor on conductivity 21
M. Angelopoulos, A. Ray, A. G. MacDiarmid (Philadelphia, PA, U.S.A.) and A. J. Epstein (Columbus, OH, U.S.A.)

Polyaniline; model studies 31
T. Hjertberg, M. Sandberg, O. Wennerström and I. Lagerstedt (Göteborg, Sweden)

Soluble conducting polymers: the poly(3-alkylthienylenes) 41
S. D. D. V. Rughooputh, M. Nowak, S. Hotta, A. J. Heeger and F. Wudl (Santa Barbara, CA, U.S.A.)

Polyene chains in molecular electronics 51
S. Roth (Stuttgart, F.R.G.)

UHV-compatible processing of conducting polymers: polythiophene 57
W. R. Salaneck, C. R. Wu, J. O. Nilsson (Linköping, Sweden) and J. L. Brédas (Namur, Belgium)

Insulator-to-metal transition in polyaniline: effect of protonation in emeraldine . . . 63
A. J. Epstein, J. M. Ginder, F. Zuo (Columbus, OH, U.S.A.), H.-S. Woo, D. B. Tanner (Gainesville, FL, U.S.A.), A. F. Richter, M. Angelopoulos, W.-S. Huang and A. G. MacDiarmid (Philadelphia, PA, U.S.A.)

Electronic processes in extended conjugated polymer chains 71
D. Bloor (London, U.K.)

Conducting polymers: what does the future hold? 79
A. G. MacDiarmid (Philadelphia, PA, U.S.A.)

New Results in Conducting Polymer Research

Electronic structure of conducting polymers: investigations of oriented samples by electron energy-loss spectroscopy 87
J. Fink (Karlsruhe, F.R.G.)

The physical meaning of the conjugation length in polymers 95
H. Kuzmany and J. Kürti (Vienna, Austria)

Spectroscopic study on the halogen-mixed crystals of halogen-bridged platinum complexes 103
M. Tanaka, S. Kurita, M. Haruki (Yokohama, Japan) and M. Fujisawa (Tokyo, Japan)

Effects of magnetic order on charge transport in conducting polymers. 109
P. Kuivalainen, H. Stubb, H. Isotalo and K. Lindberg (Espoo, Finland)

Spectroelectrochemical studies of redox mechanisms in polyaniline films. Evidence of two polaron–bipolaron systems 117
E. M. Geniès and M. Lapkowski (Grenoble, France)

Photoinduced absorption of gap states in iodine-doped polyacetylene 123
E. Ehrenfreund, Z. Vardeny, O. Brafman (Haifa, Israel), R. Weagley (Webster, NY, U.S.A.) and A. J. Epstein (Columbus, OH, U.S.A.)

Part II *Synthetic Metals*, **volume 21, issue 2**

Contributed Papers

Overdoping and the capacitive effect in polypyrrole. 129
J. Tanguy and N. Mermilliod (Gif-sur-Yvette, France)

Water effects in polyaniline: a new conduction process. 135
J. P. Travers and M. Nechtschein (Grenoble, France)

Pressure, temperature and field dependence of hopping conduction in polyaniline 143
B. Lundberg (Umeå, Sweden), W. R. Salaneck and I. Lundström (Linköping, Sweden)

Electronic structure of the alkyl, benzyl and methoxy derivatives of polythiophene 149
B. Thémans, J. M. André and J. L. Brédas (Namur, Belgium)

Optical spectroscopy and resonance Raman scattering of polyaniline during electrochemical oxidation and reduction. 157
N. S. Sariciftci and H. Kuzmany (Vienna, Austria)

Influence of composition and conformation on the electronic structure of emeraldine and related molecules 163
C. B. Duke, A. Paton, E. M. Conwell (Webster, NY, U.S.A.), W. R. Salaneck and I. Lundström (Linköping, Sweden)

Polypyrrole prepared by chemical vapour deposition using hydrogen peroxide and hydrochloric acid 169
A. Mohammadi, I. Lundström, W. R. Salaneck and O. Inganäs (Linköping, Sweden)

Spectroscopic studies of polyaniline 175
D. Bloor and A. Monkman (London, U.K.)

Electronic structure and properties of dimethylaniline polymers. 181
Ph. Snauwaert, R. Lazzaroni, J. Riga and J. J. Verbist (Namur, Belgium)

Electronic structure of conducting polymers from heteroaromatic bicyclic compounds 189
R. Lazzaroni, A. De Pryck, Ch. Debaisieux, J. Riga, J. Verbist, J. L. Brédas, J. Delhalle and J. M. André (Namur, Belgium)

Electronic structure of polythiophene 197
C. R. Wu. J. O. Nilsson, O. Inganäs, W. R. Salaneck (Linköping, Sweden), J.-E. Österholm (Kulloo, Finland) and J. L. Brédas (Namur, Belgium)

The effect of ammonia on the physical properties of polypyrrole 203
G. Gustafsson and I. Lundström (Linköping, Sweden)

Some new electrochemical results on the properties of conducting polymers. 209
J. Heinze, J. Mortensen and K. Hinkelmann (Freiburg i. Br., F.R.G.)

Fourier transform infrared study of lightly doped polythiophene under d.c. electric fields. 215
A. Ivaska, J.-E. Österholm, P. Passiniemi (Kulloo, Finland), P. Kuivalainen H. Isotalo and H. Stubb (Espoo, Finland)

Electronic structure of sulphur-containing conducting polymers. 223
J. Riga, Ph. Snauwaert, A. De Pryck, R. Lazzaroni, J. P. Boutique, J. J. Verbist, J. L. Brédas, J. M. André (Namur, Belgium) and C. Taliani (Bologna, Italy)

Vibrational studies of poly(*para*phenylene): comparison with oligophenyls 229
J. P. Buisson, S. Krichène and S. Lefrant (Nantes, France)

Electronic states and electrical conductivities of polyvinylenesulphides 235
Y. Ikeda, I. Nagoya and M. Ozaki (Tokyo, Japan)

Optical studies on poly(*para*phenylene) thin film prepared by electroreduction. . . . 241
G. Froyer, Y. Pelous, F. Maurice (Lannion, France), M. A. Petit, A. Digua and J. F. Fauvarque (Villetaneuse, France)

Raman spectroscopy of conductive polypyrroles 249
K. M. Cheung, B. J. E. Smith, D. N. Batchelder and D. Bloor (London, U.K.)

Part III — *Synthetic Metals*, volume 21, issue 3

Contributed Papers

Thin layers of poly(fluoroaluminium–phthalocyanine) 255
M. Dugay and C. Maleysson (Aubière, France)

Variable band filling and an insulator-to-metal transition in a structure-enforced molecular metal 261
M. Almeida, J. Gaudiello, T. J. Marks, J. C. Butler, H. O. Marcy and C. R. Kannewurf (Evanston, IL, U.S.A.)

The optical properties of AsF_5-doped *trans*-polyacetylene. 267
G. Leising, M. Filzmoser and H. Kahlert (Graz, Austria)

Coulomb correlations in one-dimensional conductors with incommensurate band fillings and the semiconductor–metal transition in polyacetylene 271
D. Baeriswyl, J. Carmelo and K. Maki (Copenhagen, Denmark)

Spin dynamics of field-induced spin density waves in Bechgaard salts 279
K. Maki and A. Virosztek (Stuttgart, F.R.G.)

Influence of the conjugation length of polyacetylene chains on the d.c. conductivity 285
D. Schäfer-Siebert, S. Roth (Stuttgart, F.R.G.), C. Budrowksi (Warsaw, Poland) and H. Kuzmany (Vienna, Austria)

Kinetics of electrochemical n-doping of polyacetylene investigated by impedance and galvanostatic pulse measurements 293
G. Nagele, G. E. Nauer, H. Kuzmany and J. Kürti (Vienna, Austria)

First principles investigation on the validity of the Peierls mechanism for the dimerization energy of *trans*-polyacetylene. 301
J. Ashkenazi (Haifa, Israel), W. E. Pickett, B. M. Klein (Washington, DC, U.S.A.), H. Krakauer (Williamsburg, VA, U.S.A.) and C. S. Wang (College Park, MD, U.S.A.)

Model calculations of polymer heterostructures: quantum wells in conjugated molecular chains and spacer molecules in 'molecular wires' 305
R. Ruckh, E. Sigmund, H. Sixl and S. Roth (Stuttgart, F.R.G.)

Orientational order in particles of solubilized polyacetylene 313
C. Cuniberti, S. Fuso, P. Piaggio, G. Dellepiane (Genoa, Italy) and R. Tubino (Milan, Italy)

Influence of additives on the electrochemical oxidation of polyacetylene. 319
B. Krische and S. Söderholm (Stockholm, Sweden)

Bridging materials between hydrogenated amorphous silicon and polyacetylene: preparation, structural and electronic properties 325
S. Nitta, S. Nonomura, R. Takagi, A. Yasuda and N. Kojima (Gifu, Japan)

How many kinds of solitons exist in polyacetylene?. 331
K. Pesz (Wrocław, Poland)

Conductivity measurements on doped poly(substituted)acetylenes 337
A. Furlani, C. Napoletano, R. Paolesse and M. V. Russo (Rome, Italy)

Electrical properties of polymers prepared from iodo-(4-nitrophenyl)acetylene 343
M. Rotti, H. Krikor and P. Nagels (Antwerp, Belgium)

Highly conducting iodine-doped poly(copper-yne) from phenylacetylene. 353
H. Krikor, M. Rotti and P. Nagels (Antwerp, Belgium)

The role of dopant environment in electret-forming polymers 361
M. Castiñeira, J. C. Conesa, J. M. Palacios and E. Castañeda (Madrid, Spain)

Electrical properties of quasi-one-dimensional semiconductor halogen-bridged platinum complexes. 373
M. Haruki, M. Tanaka and S. Kurita (Yokahama, Japan)
